About Guanyu

Guanyu was established in Qingdao in 1997, started with plastic products wholesale business. With 20 years' continuous efforts and devotion in developing designing and manufacturing storage products, the company has been successfully transformed into a national leading provider for material handling and storage solutions.

We offer the comprehensive storage solutions in the key segments of plastic containers, shelving and racking systems, storage bins, plastic pallets and dollies, workshop equipments and OEM services across all industry.

Guanyu Commitment

In order to ensure and provide you the finest quality, all products are used with 100% virgin materials (without doping) in the whole process of production. Guanyu committed to all customers within 3 years from the date purchase or shipment, we will either repair or replace, at its discretion, for any defective products in material or workmanship free of charge.

Note: this manufacturer' s warranty does not apply to any defect resulting from accident, misuse, modification, improper application and inadequate maintenance.

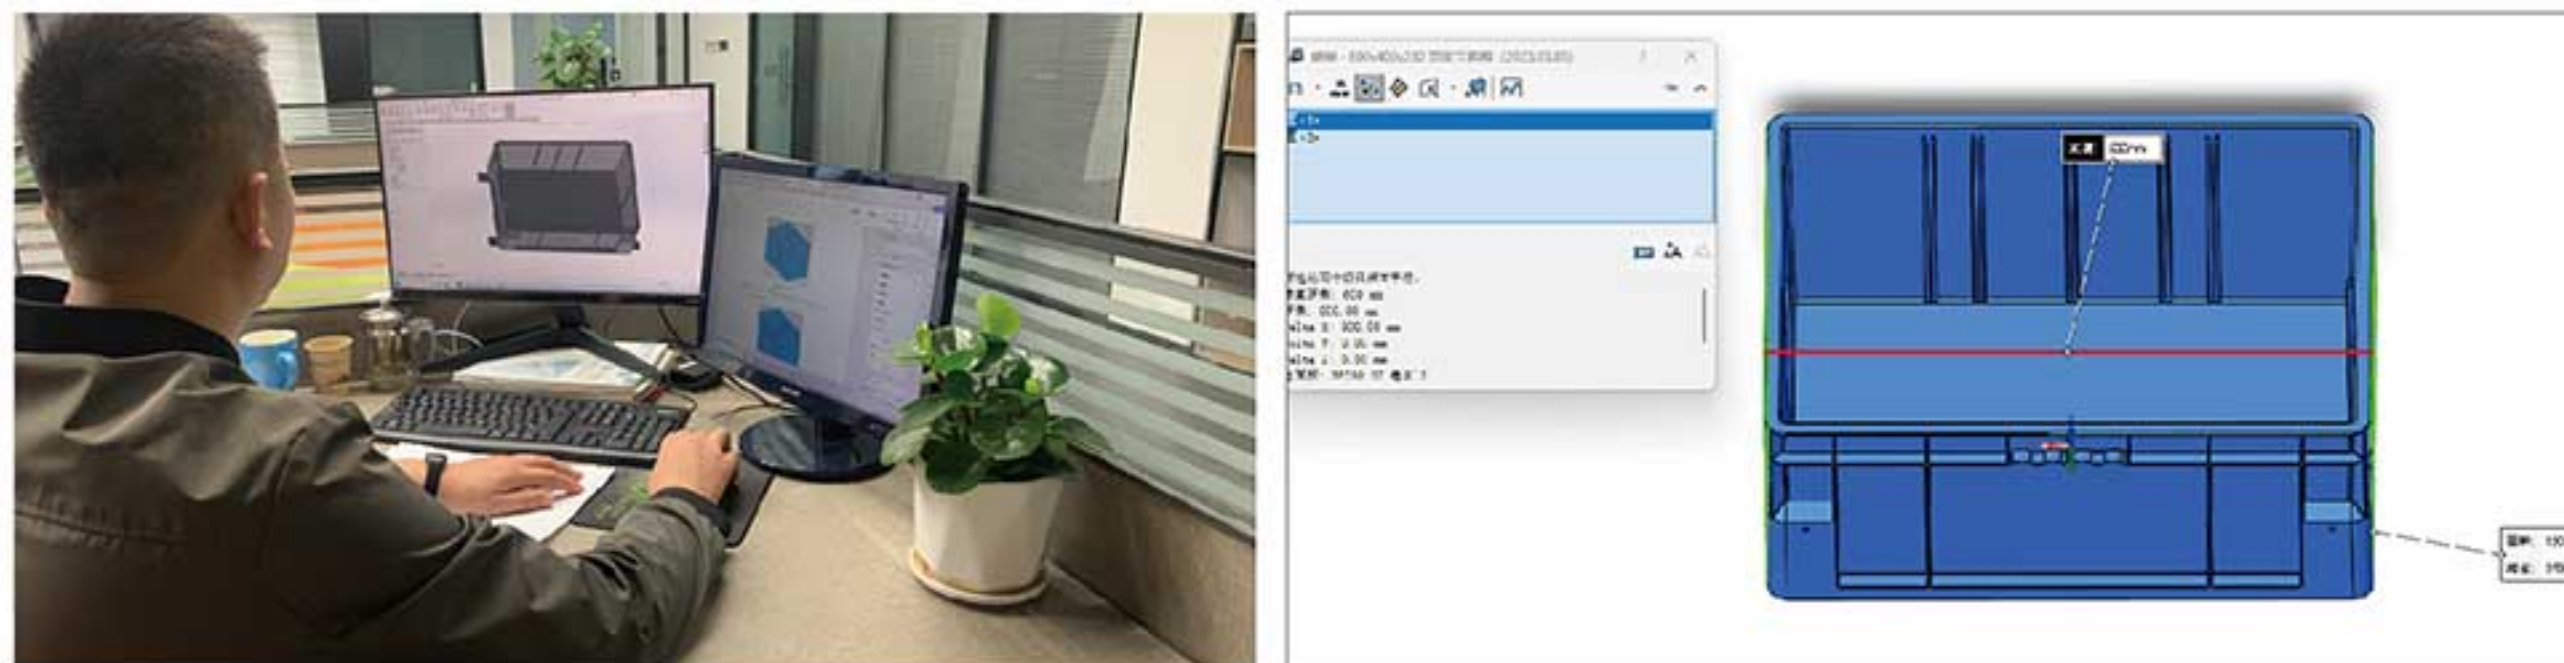

Technical Assistance

Cooperate with world renowned institutions and build a scientific research centre for analyzing and testing of raw materials and studing for product intelligence, automation, information technology, system control and ensure to meet the modern development of storage technology.

R&D Capabilities

Guanyu possesses a professional and experienced team of R&D who has many years expertise in product design and manufacture.

Quality Control Management

Quality as our core value, we impose the strictest quality control system from the beginning stage of design till the end of production process. All production procedure and product testing methods are carried out in accordance with industrial practice and international standard.

Hanging on Panel Rack

Hanging on Rail Rack

Stack-n-Nest Bins

Features:

1. Made of high strength polypropylene with reinforced structure
2. Stackable on each other or hangable on the louvered panel
3. Nestable in each other to save space during transportation
4. Available in 6 sizes and customized color

Built-in lockers

multiple hangers

Reinforced ribs on bottom

Stack-n-nest bins are great for organizing and storing small to large parts, tools and hardware. They are also commonly used for garage storage, tools storage, craft storage, products and parts to display in a retail or repair shop, medication, pet supplies, office supplies and anything else that you can think of.

Stack and nest bins could also hang on a wall or panel in an office or even inside a plumber's or electrician's van.

Stackable: Built-in lockers design to ensure the stable stacking

Nestable: save up to 70% space while nested

Hangable: full width lip, more secure fixing on panel, improves stability up to 3 times

Working with rack for easy picking

Plastic Shelf Bins

Features:

1. Made of high strength polypropylene and easy to clean
2. Perfect to store small parts and components in any industry
3. Stackable on each other and works with wire shelving, racking
4. Integral label holder design for easy identification
5. Available in 12 sizes to store a wide range of different items

Plastic shelf bins are designed to work with shelving racks and storage cabinets to help maximize the storage space and make sure all items are stored in order. With reinforced walls and bottom, these bins are built to withstand the rigors of daily use, ensuring long-lasting performance.

The optional dividers can help further organize smaller items within the bin, keeping them separated and easily accessible.

Plastic Shelffull Bins

Plastic shelffull bins are an adaptable and efficient storage solution that can help improve organizational efficiency. They allow for the maximization of storage space. Plastic shelffull bins work with shelving or racking that maximizes storage space, resulting in a tidy and organized solution. From manufacturing to healthcare, shelffull bins upgrade storage and organization.

Features:

1. Made of high strength polypropylene with reinforced base and sides.
2. Available in 38 sizes to store a wide range of different items.
3. Shelffull bin can hold up to a maximum of 8SKUs.
4. Width and length dividers keep items neatly separated.
5. Work with shelving system for optimal storage capacity.

Attached Lid Containers

Attached lid containers are reusable storage containers ideal for use in order picking, distribution, and storage applications. These containers can stack for maximized storage and nest when empty to save space. Reinforced and textured bottoms provide a sure grip on conveyor belts.

Features:

1. Made of high strength polypropylene with reinforced wall&bottom
2. Stackable with lid for convenient storage and delivery
3. Nestable to save space when empty
4. Comfortable handling design for easy lifting
5. Smooth surfaces and inner wall for easy cleaning
6. Convenient moving with dolly.

Lockable with security tie

Eco-friendly

Nestable for space saving

Nestable only

Multi-functional Stacking Containers

Durable and versatile, this plastic stacking storage containers offer efficient space-saving solutions. They are perfect for organizing tools, metal parts, toys, or household items. Stackable design maximizes vertical storage space, and comfortable handle makes lifting and moving convenient. Ideal for home, garage, warehouse or office use.

Features:

1. Durable and lightweight plastic construction with 6-8 years lifespan.
2. Stack freely and firmly to save space.
3. Reinforced ribs all around to increase strength.
4. Easy to clean and maintain.
5. Customized color available with MOQ of 500pcs.

Stacking Containers

Features:

1. These euro containers are rigid and robust
2. Suitable for any industry and for any application
3. Suitable for conveyor systems due to its rigid construction
4. Euro container dollies for transportation and euro container lids are available separately

Euro stacking containers, also known as Euro crates or Euro bins are versatile, heavy duty, strong plastic boxes that stack only. Plastic stacking containers and crates generally have a greater volume capacity due to their straight sides. Our Euro (European standard size) stacking containers can be tailored to suit your requirements with drop on lids, inner dividers, personalized print and colors.

Automation Containers

Automation containers are specially designed to work with automated storage and retrieval system (ASRS).

The heavy duty plastic containers are widely applied in E-commerce warehouses, Regional Logistics Center, Pharmaceutical Distribution Center and Intelligent Manufacturing Factories, greatly convenient the storage and picking process.

Features:

1. Comfortable handling design for robot hands picking
2. Smooth surfaces and inner wall for easy cleaning
3. Double wall and welded bottom largely enhance the load capacity up to 50-80kg.
4. Sunken textured label areas are reserved for Barcode or RFID stickers

Plastic Pallet

Made of polyethylene (or polypropylene) for good quality and long lifespan, Guanyu plastic pallets are maintenance free and safe to handle than regular wooden pallets. Features 4-way entry and serrated deck with holes for drainage, plastic pallets are ideal for export, warehouse turnover, pharmaceutical, medical, and food applications.

Features:

1. Made of PP (or PE) with heavy duty steel tubes for long lifespan
2. Anti-slip rubber inserted for safe usage.
3. Four-way entry offers convenient loading and lifting for forklift
4. Reinforced round-corner edges on all sides for logo printing
5. Recyclable and washable

Noiseless Platform Handcarts

Features:

- 1.Noiseless moving with high strength plastic platforms.
- 2.Two fixed, two swivel noiseless castors for easy moving and usage.
- 3.Strong, light-weighted with high load capacity.
- 4.Fixed handle and foldable handles are available for choice.
- 5.Available in brakes.

Platform handcart, also known as platform truck or trolley, is a versatile and practical tool widely used in various industries for transportation of goods and materials. It typically consists of a flat deck or platform supported by wheels or casters, which makes it easy to move heavy or bulky items around with minimal effort.

Handcart Type	Item No.	Platform Dimension L×W (mm)	Type of Handle	Platform height (mm)	Handle height (mm)	Dia. Of castor (mm)	N.W. (kg)	Load Cap. (kg)	QTY/20'GP (pcs)	QTY/40'HQ (pcs)
